

This package contains your radiation dosimeter badges.

- > Remove the badges from the bubble wrap bag and attach the clip.
DO NOT remove the dosimeter from the clear plastic container. This will invalidate the reading.
- > Each badge will have the name of the person wearing the badge (where it says "SAMPLE" in the picture to the left).
- > One of the badges will be labeled "CONTROL" and should be kept in an area within the workplace where it will not be exposed to radiation.
- > The little picture on the badge shows where the badge should be worn.

The badge should be worn somewhere between the neck and the waist on the front of the body and outside of any lead aprons.

Before the end of the wear period, you will receive a package of dosimeters for the next period.

When the new badges arrive:

1. Issue the new badges to the appropriate wearers, put the new control badge in the same place that you kept the old period's control badge.
2. **Be sure to swap the clip, your second shipment will not have any clips.**
3. Collect all the badges from the old period, including the old CONTROL badge, and put them in the supplied return envelope.
4. Return the badges including the control to Sierra Radiation via US Mail. (Don't forget postage). In most cases the postal service is sufficient, however if your dose results are essential (i.e., an upcoming audit) consider using a trackable parcel service such as UPS.

Remember:

You can download your dose report from our website at www.sierradosimetry.com!

All badges are the property of Sierra Dosimetry. Any badge not returned within 60 days from the end of the wear period, is subject to be charged \$15 per badge.

Acceptance of badges constitutes acceptance of all Terms and Conditions as stated at www.sierradosimetry.com/terms-and-conditions.aspx

Thank you for allowing Sierra Radiation Dosimetry Service, Inc. to be your dosimetry provider. If you have any questions about your service please contact us.
